NOTES TO THE ABRIDGED FINANCIAL STATEMENTS

- Other income includes the profit on sale of the Randgold & Exploration Company Limited ("Randgold") shares of R59.2 million, 2,656,890 Randgold shares were sold during the quarter under review and concludes our investment in Randgold.
- United Investments of R165.3 million represents 92,865,440 JCI Shares and Debentures received at market price in terms of the Barnat Exploration Limited ("Barnat"), Scheme of Arrangement concluded at 30 September 2003.
- Adjustments have been made to the financial instruments to reflect the fair value of these instruments at the end of the period in terms of AC 133.
- No adjustment has been made to reflect mining assets at their fair value. These assets are in the process of being revalued jointly with Placer Dome South Africa (Pty) Limited.
- "Gold produced" represents the kilograms or ounces of gold which have entered the metallurgical process, while "Gold sold" represents dispatches from the mine to the refinery.
- Non-cash operating costs generally includes the amortisation of Western Areas' share of South Deep and the change in inventory for the period.
- Non-recurring loss relates to the reversal of historical consolidation retained earnings on disposal of a subsidiary company, Barnat.

LETTER TO SHAREHOLDERS

Attributable profit after taxation for the September quarter amounted to R110.3 million compared to R42.8 million for the previous quarter. The increase in attributable profit after taxation, despite a decrease in operating profit from gold of R20.1 million quarter on quarter, was as a consequence of the income from the sale of the remaining Randgold shares and the provision of R68.2 million in terms of the exchange revaluation and present value adjustment for the derivative transaction.

Gold production increased by 10% in the September quarter, underpinned by the availability of backfill and a constructive and rapid settlement in terms of the wage negotiations. The benefit of the higher production was not reflected in revenue as a consequence of bullion delivered but not refined and sold due to the Rand Refinery year-end stocktake and the lower Rand gold price. The yield for the quarter was down, mainly due to the treatment of 76,000 tonnes of low grade surface material to help fill the plant and provide backfill material, falling which the yield would have been in line with previous quarters. Total production costs increased to R162.0 million from R147.5 million, primarily as a consequence of the annual wage increases and adjustments for consignment inventory expensed of R20 million, of which R13 million relates to 2002 which was accounted for in the non-cash costs for the current year. Total production costs per kilogram decreased marginally to R83,106 per kilogram from R83,549 per kilogram. The cash costs increased by 4% to R68,311 per kilogram from R65,980 per kilogram.

The disposal of Barnat was completed on 30 September 2003. The tradeable instruments received in terms of the Barnat disposal (see note 2), of which the Debentures were sold subsequently, for a consideration of R97.2 million, will be utilised, in conjunction with other alternatives, to fund the Company's portion of the South Deep joint venture expenditure.

The final equipping of the South Deep Twin Shaft Complex ("Shaft") is now scheduled to be completed in the second half of 2004. Final commissioning of the Shaft has been delayed to ensure the integrity of the suspended shaft steelwork and design specifications thereof. Efforts are being made to accelerate the equipping without compromising the quality and safety standards of the Shaft. Development of the Shaft and supporting infrastructure continues to be one of our main areas of focus in this long life, world-class asset.

AANTEKENINGE BY VERKORTE FINANSIËLE STATE

- Ander inkomste sluit die wins op die verkoop van die Randgold & Exploration Company Limited ("Randgold") aandele van R59.2 miljoen in 2,656,890 Randgold-aandele in gedurende die oorspronklike tydperk en sluit ons belegging in Randgold af.
- Genoteerde belegging van R193.3 miljoen verteenwoordig 92,855,440 2C-aandele en skuldbrifre in wat ingevolge die Barnat Exploration Limited ("Barnat") reëlinskema wat op 30 September 2003 afgehandel is, teen markprys ontvang is.
- Aanpassing is aan die finansiële instrumente aangebring om hulle billike waarde aan die einde van die tydperk te reflekteer.
- Geen aanpassing is gemaak om mynabates teen hulle billike waarde te weerspieël nie. Hierdie bates word tans in samewerking met Placer Dome South Africa (Pty) Limited herwaardeer.
- "Goud geproduseer" verteenwoordig die kilogram of onse goud wat die multi-etappe proses binnegegaan het, terwyl "Goud verkoop" versendings van die myn na die raffinadery verteenwoordig.
- Nie-kontantbedryfskoste sluit oor die algemeen die amortisering van Western Areas se aandele van South Deep en die verandering in voorraad vir die tydperk in.
- Enmalige verlies hou verband met die omswaai van historiese konsolidering teruggehoue verliese by die verkoop van 'n filiaal, Barnat, in.

BRIEF AAN AANDEELHOERS

Die toeskrifbare wins na belasting vir die September-kwartaal het R110.3 miljoen beloop in vergelyking met R42.8 miljoen vir die vorige kwartaal. Die styging in toeskrifbare wins na belasting ten spyte van 'n afname in bedryfswins uit goud van R20.1 miljoen teenoor verlore kwartaal was die gevolg van die inkomste uit die verkoop van die oorblywende Randgold-aandele en die voorsiening ten bedrae van R6.2 miljoen ingevolge die wisselkoersverandering en huidige waarde aanpassing vir die afgeleide transaksie.

Goudproduksie het in die September-kwartaal met 10% toegeneem, ondersteun deur die beskikbaarheid van terugvulling en 'n konstruktiewe en vinnige sikkings ingevolge die loononderhandelings. Die voordeel van die hoër produksie is nie in inkomste weerspieël nie aangesien smeltmetaal afgelewer maar weens Rand Refinery se jaareinde-voorraadopname nie geaffineer en verkoop is nie en die laer randgoudprys. Die opbrengs vir die kwartaal het algemeen, hoofsaaklik as gevolg van die behandeling van 76,000 metriek ton laegraad-oppervlaktmateriaal om die aantel te help opvul en terugvullingsmateriaal te verskaf, wat andersins die opbrengs in ooreenstemming met vorige kwartale sou bring. Totale produksiekoste het van R147.5 miljoen tot R162.0 miljoen gestyg, hoofsaaklik weens die jaarlikse loonverhogings en aanpassings vir besendingsvoorrad ten bedrae van R20 miljoen, waarvan R11 miljoen met 2002 verband hou en wat in die nie-kontantkoste vir die huidige jaar in rekening gebring is.

Totale produksiekoste per kilogram het marginal na R83.106 per kilogram van R83.549 per kilogram afgeneem. Die kontantkoste het met 4% tot R68.311 per kilogram van R65.980 per kilogram toegeneem.

Die verkoop van Barnat is op 30 September 2003 afgehandel. Die verhandelbare instrumente ingevolge die Barnat-verkoop (sien aantekening 2), waarvan die skuldbrifre daarna vir 'n teenprestasie van R97.2 miljoen verkoop is, sal tesame met ander alternatiewe gebruik word om die Maatskappy se deel van die besteding aan die South Deep gesamtelike onderneming te befonds.

Die finale uitrusting van die South Deep Twee Skag Komplex ("Skag") sal nou volgens skedule in die tweede helfte van 2004 afgehandel word. Die finale ingebruikstelling van die Skag is vertrag om die integriteit van die hangskagstaalwerk en ontwerpspesifikasies daarvan te verseker. Pogings word aangewend om die uitrusting te versnel sonder om die gehalte en veiligheidsstandaarde van die Skag ingevaar te stel. Die ontwikkeling van die Skag en ondersteunende infrastruktuur bly steeds een van ons hoofokusgebiede in hierdie lewenslange wêreldklasbates.
